EDUCATION

Noida Institute of Engineering & Technology (NIET)

Bachelor of Technology in Computer Science

CGPA: 9.3/10.0 | Expected Graduation: July 2028

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Architecture & Parallel Processing, Object-Oriented Programming, Discrete Mathematics, Calculus

Holy Public School

Senior Secondary Education

Percentage: 81.8%

September 2024 – July 2028

Greater Noida, India

Graduated: 2024

Greater Noida, India

TECHNICAL SKILLS

Programming Languages: Python, C++, C, Java, JavaScript, TypeScript, HTML/CSS

Web Technologies: Flask, FastAPI, SQLAlchemy, Bootstrap, Jinja2, RESTful APIs, WTForms, Pydantic

AI/ML & LLM: LangChain, LangGraph, OpenAI API, Groq, Hugging Face Transformers, NumPy, Pandas, Qdrant

Database & Tools: SQLite, PostgreSQL, MongoDB, Redis, Docker, Git, Selenium, BeautifulSoup

APIs & Services: Amadeus API, Nutritionix API, Twilio, Spotify API, SMTP, Sheety API, Google Sheets API

Core Competencies: Data Structures & Algorithms, AI Agents, RAG Systems, Web Scraping, Automation, OOP

PROJECTS

RAG-based PDF Q&A System | [Link](#)

March 2026

Python, LangChain, Qdrant, OpenAI API, Streamlit, Docker

- Built a document Q&A system that allows users to upload any PDF, index it, and receive context-grounded streamed answers with page references
- Implemented chunked embedding pipeline using LangChain's text splitter and OpenAI embeddings, persisted in a local Qdrant vector database via Docker
- Designed hallucination-free response logic — system explicitly responds when answer is absent from the provided document context

Full-Stack Blog Platform | [Link](#) | [Live Demo](#)

December 2025

Flask, SQLAlchemy, Flask-Login, WTForms, Bootstrap, PostgreSQL, Vercel

- Designed and developed a full-stack blogging platform to enable secure content creation, management, and user interaction
- Implemented role-based authentication and session management using Flask-Login and SQLAlchemy ORM
- Built a responsive frontend with Jinja2, Bootstrap, and CKEditor to support rich-text publishing

Flight Deals Automation System | [Link](#)

November 2025

Python, Amadeus API, Twilio, Sheety

- Developed an automated system to monitor flight prices and identify low-cost travel opportunities
- Integrated Amadeus API and Google Sheets (via Sheety) to manage destinations, IATA codes, and target prices
- Enabled real-time WhatsApp and email notifications using Twilio and SMTP for timely user alerts

Exercise Tracker using NLP APIs | [Link](#)

September 2025

Python, Nutritionix API, REST APIs

- Built an exercise tracking system that converts natural language workout descriptions into structured fitness data
- Utilized Nutritionix NLP APIs to extract exercise type, duration, and calorie estimates from free-text input
- Automated workout logging with timestamps to Google Sheets using RESTful API integration

CERTIFICATIONS & ACHIEVEMENTS

- LeetCode:** Solved 101 problems (78 Easy, 23 Medium) with 74.32% acceptance rate | Contest Rating: 1,532 | Global Rank: 298,122/847,437 (Top 35.62%)
- Project Portfolio:** Developed 35+ projects spanning RAG systems, full-stack web applications, AI-powered tools, and API-driven automation systems
- Hackathons:** Secured **3rd Prize** at "Level Up" event (Reboot Club, NIET); participated in Zero to One Hackathon (Chandigarh University) and Code-A-Thon 2.0 (NIET)
- Certifications:** 10+ certifications including AI Certification (Devtown), Generative AI Mastery (NxtWave), Google Cloud Arcade Facilitator Program (Google), Programming in Python & DSA using Python (Infosys), Introduction to Cybersecurity (Cisco Networking Academy)
